Thermal Glass Room Enclosures Add Space Economically

YADKINVILLE, N.C. (March 26, 2009) – Thermal glass room enclosures are an economical way to add space to an older home or business by taking advantage of an existing roof and patio structure.

Unlike the climate of a hot sunroom, which usually has a glass roof, the temperature of an insulated glass room enclosure can be constantly maintained. Constructed from tempered glass windows and aluminum frames, the glass room enclosure structures are strong and durable.

Glass Doctor of Winston-Salem is working with its supplier, West Window Corp. of Martinsville, Va., to create custom designs to meet requests for thermal glass room enclosures. Sliding glass doors and tinted glass are available options. Windows for the room enclosures can be single-hung or double-hung with screens, single sliders with screens, or picture windows with fixed glass.

For more information, contact Phil Stanley of *Glass Doctor* of Winston-Salem at 336-679-3535.
