

SUPER SPACER[®]

The Window Technology Built to Last

Why Does It Look Different?

The dark edge between the panes of glass is intentional — it's our upgraded Super Spacer[®] warm-edge technology.

Unlike traditional shiny metal spacers, Super Spacer[®] uses advanced flexible foam technology that improves insulation, durability, and long-term performance.

Warranty You Can Trust

Standard Metal Spacer

- Typical single-seal system
- Limited protection
- 5-Year Warranty

Super Spacer

- Advanced dual-seal technology
- Improved durability & energy performance
- 10-Year Warranty on Material & Fogging

WHY HOMEOWNERS LOVE SUPER SPACER[®]

Better Energy Efficiency

Helps reduce heat transfer at the edge of the glass for a more comfortable home and improved energy savings.

Helps Prevent Fogging

Advanced dual-seal technology helps keep moisture out and your windows clear longer.

Flexes Instead of Cracking

Traditional metal spacers are rigid and can fail over time. Super Spacer[®] flexes with temperature changes to help prevent seal failure.

Longer Lasting Performance

Trusted for 35+ years and engineered for long-term durability.

The Difference You See Is The Quality You Get

- ✓ Better insulation
- ✓ Reduced condensation
- ✓ Improved durability
- ✓ Longer warranty coverage
- ✓ Modern warm-edge technology
